MULTIMEDIA

TEMPORARY INTERVENTION / POP-UP

## Biography

We are built for one purpose – make more public art. We design, build and promote interactive, and immersive, works of wonder so we can inspire the next. From fire-shooting portals to code-talking cubes from another dimension, we live for interactive and immersive art installations.

Advancements in technology have allowed us to realize creative dreams we never thought possible, and in that spirit, we embrace the technology of yesterday, today, and tomorrow to create large-scale, tour-ready, turnkey installations and experiences.

We are passionate about what we do and are committed to delivering inspiring encounters. Whether you choose something from our current catalogue, or connect with us for a custom commission, we pride ourselves on delivering creative, robust, safe, and reliable installations and experiences.
