MURAL

Biography

CÉSAR GOCE (Valencia, Spain. 1994)

Originally from the world of graffiti, after his time at the Faculty of Fine Arts in Valencia, his paintings have evolved into a style that combines classical techniques with the use of contemporary resources and themes. His work includes both studio work and mural interventions in the urban space.

'The central axis of my artistic production lies in the distortion of the image, an image whose nature has been irremediably altered due to the influence of new technologies, the passage of time and contemporary lifestyles. The result is an imaginary in which analog and digital, figuration and abstraction coexist and complement each other'.

Ultra-contemporary style characterized by the use of reduced color palettes, dynamic compositions and strong contrasts of light - dark without neglecting the thoroughness, richness of nuances and expressiveness of each brushstroke. An art that tries to explore the possibilities of creation resulting from the human-machine symbiosis.
