MURAL

Biography

Born in Mexico City in 1983, at a young age he moved to the town of Toliman where migration to California is part of the local society for this reason he was decisive in learning about graffiti at a young age, this graffiti derived from the Chicano and cholo subcultures as well as the great curiosity for the drawing techniques displayed by his father, who is an amateur cartoonist, mark his beginning in the world of graffiti.

It is in this process that he comes to adopt the style that characterizes him today and continually seeks experimentation with new techniques and styles to nurture his style, which also leads him to create a social inclusion projector where his purpose is to create thematic murals and the rescue of the oral tradition.
