Biography

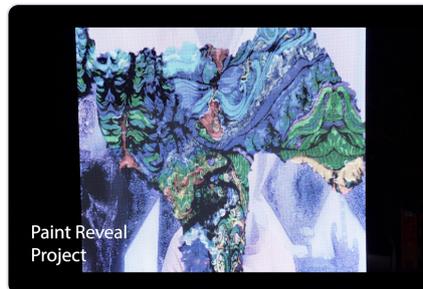

The Zenith Creative is a multidisciplinary media company founded by Brian Olivo in 2020 that is dedicated to pushing the boundaries of art and technology. We specialize in audio, lighting, lasers, video, special effects and set design, blending these elements into immersive and unforgettable experiences.

Our recent work focuses on cutting edge multimedia art installations that fuse lighting, video, depth cameras, and sound to create unique, eccentric environments for a wide range of applications. With expertise in branding, marketing activations, and interactive design, we craft installations that invite audiences to engage deeply and leave lasting impressions. At The Zenith Creative, every project is designed to spark curiosity, inspire connection, and make the experience truly unforgettable.
