

Letter of Interest

This project has captured my interest because of my ability to engage the public with a bold style of art in public spaces. I am highly passionate about the creative processes involved in creating murals, and how it tends to draw an interest with the dynamics of size and imagery. For over twenty-five years I have been commissioned to create works of art in a variety of locations. This has provided me with the knowledge needed when dealing with the effects of weather exposure and materials that will withstand outdoor elements. Painting murals with historical and cultural significance has given me valuable experience with public engagement and community relations as well. I have a degree in graphic design, which allows me to give a digital conceptual renderings to my clients for review. My working methods consist of digital layout, painting murals on-site, or painting on panels in my studio and then installing upon completion.

As a muralist, I consider myself to be a professional in my ability to handle very large-scale works, and I have complete confidence in my abilities to execute this project. My goal and desire is to create a work of art that will showcase the spirit of Boynton Beach, and leave an impression that will last for generations.
